Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **Global Health Advisory**

On 08/06/20, in close coordination with the U.S. Centers for Disease Control and Prevention (CDC), the Department of State lifted the Global Level 4 Health Advisory. The Global Advisory, initially put in place on 03/19/20, advised U.S. citizens to avoid all international travel due to the global impact of COVID-19. For more information visit: <https://www.state.gov/>.

- **State Executive Order N-33-20**

On 08/28/20, California introduced a blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities by counties. Visit [Blueprint for a Safer Economy](#) for more information and to check the status of a county. This blueprint included a health equity metric to be used along with other metrics to determine a county's tier. The purpose of [Equity Metric](#) is to ensure California reopens its economy safely by reducing disease transmission in all communities.

- **CDPH Statewide Travel Advisory**

The California Department of Public Health (CDPH) has issued a new Travel Advisory superseding the 11/13/20 guidance. Californians should avoid non-essential travel to any part of California more than 120 miles from one's place of residence, or to other states or countries. Non-essential travelers from other states or countries are strongly discouraged from entering California, and if they do, should adhere to quarantine procedures. All persons arriving in or returning to California from other states or countries should self-quarantine for 10 days after arrival, except as necessary to meet urgent critical healthcare staffing needs or engage in emergency response.

WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Precipitation will continue through this evening, Flash Flood Warnings and Advisories have been extended with a concern around recent burn scars for potential debris flows.
 - Multiple Flash Flood Warnings and Flood Advisories have been issued due to ongoing precipitation.
- Due to increase snow accumulation through the week, dangerous loose snowpack buildup may occur, Avalanche Warning's have been issued for several areas.
- Most of the precipitation will taper off by this evening with a break until Saturday night.
 - The next winter storm will begin Monday, with increased winds and precipitation.

SOUTHERN CALIFORNIA

- The majority of the Watches and Warnings will be ending today.
- Locally heavy rain remains possible across far southwest California below 5,000 feet, bringing a risk for some flash flooding and mudslides through this afternoon, especially near recent burn scars
- The next storm system is expected to approach the region by Wednesday.

WEATHER KEY POINTS

01/29/21 - 02/04/21

Friday-Thursday

- Periods of rain and higher elevation snow, primarily across central and southern California, will gradually wind down through the day and into tonight
 - Locally heavy rain remains possible across far southwest California below 5,000 feet, bringing a risk for some flash flooding and mudslides through this afternoon, especially near recent burn scars
 - Periods of heavy snow across the Sierra and southern California mountains above 5,000 feet will continue through tonight, but with intensity decreasing
 - Gusty winds over the southern California mountains will bring localized whiteout conditions above 5,000 feet where heavy snow is expected
- Some light precipitation will return to northern California on Saturday, with some locally heavier precipitation possible over the northern half of the state Sunday through early next week.
 - At this time, precipitation amounts look lighter than the storm that just occurred, but it is possible that locally heavy precipitation could develop. Later forecasts should be closely monitored.
- Strong winds are likely across far northern California Saturday afternoon into Sunday morning, and over the Sierras for Monday and Tuesday.
